

Goodmoim 'XRmeeting' Seamless Global Collaboration

a brief overview of the 'Goodmoim XRmeeting', highlighting its focus on seamless global collaboration through eXtended Reality and Artificial Intelligence technologies.

Service Overview

Virtual Reality Meetings

Combines XR (eXtended Reality) and AI (Artificial Intelligence) technologies to create a virtual meeting environment

Language-Barrier-Free Meetings

Enables seamless communication across language barriers through real-time translation services

Automatic Meeting Notes Generation

Utilizes AI-powered transcription and summarization to generate comprehensive meeting notes automatically

Goodmoim 'XRmeeting' provides a cutting-edge virtual meeting experience that breaks down language barriers and enhances collaboration through its innovative XR and AI capabilities.

Goodmoim

Goodmoim is a platform that provides seamless global collaboration using extended reality (XR) technology.

Service Purpose

- **Immersive Collaboration**

Provide a shared immersive virtual environment for remote participants to collaborate, communicate, and engage with each other in a more natural and intuitive way.

- **Enhanced Productivity**

Leverage extended reality (XR) technologies to streamline workflows, reduce distractions, and enable more efficient, focused, and productive online meetings.

- **Global Connectivity**

Facilitate seamless cross-border and cross-cultural collaboration by enabling remote participants from around the world to come together in a shared virtual space.

- **Engaging Experience**

Create a more engaging and interactive meeting experience by leveraging immersive visuals, surveys, votes, quizzes, and intuitive controls to enhance participant engagement and collaboration.

Key Features

- **Immersive XRmeeting Rooms**

Experience collaborative meetings in various themed virtual environments, from futuristic boardrooms to cozy lounges, creating an engaging and memorable experience.

- **AI-Powered Multilingual Interpretation**

Seamlessly translate conversations in real-time, allowing participants from different language backgrounds to communicate effectively and collaborate globally.

- **Automated Meeting Notes and Summaries**

Automatically generate detailed meeting notes and concise summaries, ensuring that no important information is missed and team members can stay up-to-date even if they couldn't attend.

- **No Installation Required**

Hosts and participants can access the Goodmoim 'XRmeeting' platform directly through shared links or the Goodmoim platform, without the need to install any additional software.

- **Seamless Global Collaboration**

Goodmoim 'XRmeeting' enables effortless cross-border collaboration, allowing teams to connect and work together in a virtual environment, regardless of their physical locations.

Additional Features

- **Content sharing in standalone XRmeeting rooms**

Allows participants to seamlessly share and collaborate on content within dedicated XRmeeting rooms, facilitating engaging remote discussions and presentations.

- **Integration with diverse XR spaces in the Goodmoim 'XR City'**

Connects the XRmeeting platform with a variety of virtual environments and XR spaces within the Goodmoim 'XR City', enabling users to access and interact with different XR experiences.

Goodmoim XRmeeting

Subscription Types

Subscription Type	Description
Shared (Open) type	Users can freely choose XRmeeting room themes, but cannot customize them.
Independent type	Users can select a theme and customize it with their branding and content. The XR tour feature is also available.

“Seamless global collaboration with AI-powered simultaneous interpretation and automatic meeting note generation contributes to enhancing corporate global competitiveness and individual productivity.”

Goodmoim XRmeeting

Conclusion

Goodmoim 'XRmeeting' is a groundbreaking virtual reality service that seamlessly combines advanced XR and AI technologies to provide users with a highly immersive and efficient collaboration experience. By overcoming language barriers and improving productivity, the service empowers businesses and individuals to enhance their global connectivity and collaboration capabilities within the broader Goodmoim 'XR City' ecosystem.
